## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Objections***

Claims 4-13 and 18-21 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-13 and 18-21 have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-17 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 14 and 22 are indefinite since the scope cannot be determined. The claims should be canceled. Claim 15 is indefinite since it is not clear as to what "it" on lines 3 and 4 are referring to specifically. Claim 15 is further indefinite since the scope cannot be easily determined. The preamble sets forth an accessory unit, but the last three lines set forth the battery pack, which is not actually part of the accessory unit, per se.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3 and 15-17 are rejected under 35 U.S.C. 102(a) as being anticipated by Bongers-Ambrosius et al. '949.

The patent publication to Bongers-Ambrosius et al. '949 discloses the invention as claimed including an accessory system for a cordless tool comprising a tool 1 having a motor 2, an accessory unit 5, 8 comprising a separate motor 14, a battery pack 19 releasably mounted on the accessory unit via coupling 9, and "latch" 17 for powering both motors, and a switch 3 for actuating the device. (Note: Figure 1). A further embodiment (Note: Figure 2) is disclosed which sets a tool 1, an accessory unit 5, a removable battery pack 19 for powering the tool and accessory unit connectable via "rails" 12'.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stirn, Bixby et al., Austin, Burger et al., Bongers-Ambrosius et al. '930, Carrier, Turner et al., Moore et al., and Ege et al. disclose similar tools.
